## It is our privilege and pleasure to provide our services and products to you

To our loyal clients; thank you for choosing Smith System once again to meet your fleet safety needs. We have trained over half of the current Fortune 500 group of companies with outstanding results. We trust you continue to use the Smith System because you have seen how well the "5 Keys" work. To our new customers, thank you for giving us the opportunity to earn your business. I am sure you will be pleased. Nothing is a substitute for our behind the wheel training when it comes to changing driver behavior. The products in this catalog have been carefully authored to support our on-road training programs.

You will notice our new video presentation, "Outside the Box" available in truck, step van, and small vehicle versions. This video features Jim Smith delivering our best ever "5 Key" demonstration, captured on film. We have also added the much anticipated backing modules to our on-line training.

Let us know if you have suggestions or need materials that we do not offer. Our goal is to meet our customer's needs as thoroughly as possible. You can call or visit our website for more information about our Company and the products and services we offer. Please know that our entire staff appreciates your business and we take our business - the business of preventing injuries and saving lives - very seriously.

Best regards for many accident-free miles,

  
Tony Douglas

CEO

**Smith System has been providing safety training services and products since 1952**

You will notice as you peruse our 2005 catalog that the item numbers for all our products have been revised to accommodate growth.

## TRAINING SERVICES

### Our most popular behind the wheel training program

#### One-Day Advanced Driver Training

*Improved driving skills in just one day*

Get your drivers up to speed on driving safely. Smith System offers a cost effective advanced driver training program designed to improve drivers skills and habits in one day.

#### On-Road Training

This unique program combines class training with on-the-road training. Every driver gets behind the wheel for positive reinforcement and critiquing of their driving habits and skills several times. Mistakes are corrected as they occur which makes the program an extremely effective way to learn. Our expert instructor also takes the wheel to demonstrate and explain different techniques to use while navigating through traffic.

#### The "5 Keys" to Safe Driving

The class teaches safe driving practices and stresses the "5 Keys," a proven method to reduce risks on the road. Students gain confidence and cover how to avoid accidents.

#### Positive Evaluation

This one-day advanced driver training is Smith System's most popular behind the wheel training program. The class is held on location with a maximum of five students. Everyone receives helpful information and a personalized written evaluation, provided to the employer as well, with recommendations on areas for improvement.

#### Proven Results

For a small investment of time and money the benefits of this program for a company can be infinite. The advanced driver training program has been proven to improve many company's driving records, reduce their costs and ultimately save lives. Additionally, your staff and their families will know you have their safety at heart.

The program covers the following:

- On-road instruction of Smith System principles
- Avoiding intersection and rear-end collisions
- Implementing Smith System's "5 Keys"
- Collision statistics and causes

### Your solution to in-house driver training

#### Instructor Training Course

*The definitive "train the trainer" program for internal safety training departments*

Establishing your own personalized driver training course can be obtained quickly and effectively. Whether you operate a small vehicle fleet, trucks or buses, Smith System can tailor a training program to specifically address your needs. Smith System has all the materials and training aids you will need to conduct the training in-house. Our Instructor Training Course requires a three-day session for three trainees; a four-day session with four trainees; a five-day session with five or six trainees. Smith System will conduct an on-site program at a location of your choice.

Our instructors have studied and mastered techniques that are essential to the understanding of driver perceptual behavior patterns. These same techniques can be taught to your driver trainers, giving them the necessary skills to bring our proven traffic collision prevention methods to your fleet drivers. The ability to identify the strengths and weaknesses in each driver and provide customized, practical solutions to overcoming specific driving deficiencies will be mastered by your newly certified trainers.

For companies with fewer than three instructor trainee candidates, Smith System offers a Multi-Company Instructor Training Course conducted at our Arlington, Texas headquarters, as well as other regional sites coast-to-coast. These Multi-Company training sessions focus on teaching your trainers the most common collision-related driver errors, along with specific skills and techniques to identify and correct these errors on-road. As an IACET member, Smith System gives CEUs for completing the course.

If you're ready for either your own on-site training session or our Multi-Company course, a Smith System Regional Manager is readily available to assist you in scheduling a program, time and place most convenient to you.

- Achieving fuel efficiency and reducing vehicle wear
- How attitude affects performance and record
- Creating more time to react
- Using eyes more effectively

## TRAINING SERVICES

### Instructor Refresher Course

*Renew the principles and driver training skills learned*

Reinforce your investment in your trainers. Over time, portions of any educational experience are forgotten or become blurred. We strongly recommend your certified trainers attend our Instructor Refresher Course every two years to ensure your investment in training continues to pay off.

As with most of our courses, you can choose from either a course held at your site, or attend one of our Multi-Company Instructor Refresher Courses conducted at regional sites across the U.S. Contact us to enroll in a session near you or if you have a group, schedule your own session. This refresher can result in a big reduction in your vehicle claims. CEUs are given to the students who complete this course.

### Instructor Audit Course

*A professional review of your Smith System certified trainers*

Providing quality instruction has a tremendous long-term payoff. An average collision costs a company about \$6,000. If this collision includes an injury, the average cost jumps to \$49,000. A collision involving a fatality averages \$900,000. For an organization with a 5 percent net profit margin, it will take \$116,000, \$980,000 and \$18,000,000 respectively, in sales, to pay for these mistakes. Protect the investment you've already made by having us periodically audit your certified Smith System instructors. Our one-day review and feedback will provide you and your trainers detailed analysis that will dramatically improve your organization's presentation and results.

### Smith System Half-Day Classroom Seminar

*Packed with information on collision avoidance*

The Smith System Half-Day Seminar is an effective tool in helping companies achieve the fleet safety level they desire. We've developed this program to deliver useful and compelling information to the students in an interesting and challenging way. Students walk away from our course with dozens of ideas and tips they can put into use immediately. Interactive participation, effective visual aids and a common sense approach to education enhance the presentation and retention level of the material being taught. This program built around our "5 Keys to Space Cushion Driving" is designed to teach the experienced driver field-proven techniques in traffic collision avoidance.

### Incident Review Course

*Professionalize your organization's analysis of preventability*

If your drivers are expected to use the "Smith System" while behind the wheel, it makes sense to review your vehicle mishaps based on these same "5 Keys" principles. This course is perfect for managers, supervisors and others who need education in using the "5 Keys" to provide a fair and reasonable assessment of incident preventability. CEUs are given to the students who complete this course.

### Behind the Wheel Backing Course

NEW  
COURSE

For over 50 years Smith System has known and taught that the best way to avoid a backing collision is to avoid backing. We also know that backing avoidance is not always an option. Our new Behind the Wheel Backing Course is designed to help drivers when backing is the only option. Drivers develop a true understanding of their vehicle before they practice serpentine forward and back, backing to the sight and blind sides and parallel parking.

### Customer Self-Audit Course

NEW  
COURSE

After you have made the decision to include Smith System training as a foundation for your fleet safety program, your next most important investment may be your trainers. After completing our Customer Self Audit course, your Smith System trained auditors will help you maintain the highest quality training between instructor recertification dates. This course teaches your top instructors how to successfully audit your Smith System trainers using "role playing" and our detailed audit form. This two part form will insure your instructors are effectively presenting the Smith System training. The role playing provides your Auditors techniques required to help them motivate instructors to change where needed. Only certified instructors qualify for this one day course, where a maximum of three auditors will be trained.

### Instructor Audit Forms

This 13 page audit form allows our customers to keep their training force at the top of their game. Coupled with the information gathered in our intensive one day Customer Audit Course, your auditors will be able to insure the Smith System techniques are being properly represented. This 2-part form allows the auditor to hand off valuable feedback in written form, after discussing the events of the class with the instructor. The other half of the form may be placed in the instructor's file to record the audit and goals that were set. These audit forms are only available to certified auditors.

**SSF-529 Price: \$30.00 ea.**

### Driver Skill Evaluator Course

*Train your supervisors how to assess your drivers on the road*

Smith System has developed a Driver Skill Evaluator Course that will help you and your drivers stay on top of their performance. This program provides the necessary tools for an internal supervisor to initiate refresher training via meaningful ride-along sessions. The course teaches supervisory personnel to evaluate and coach drivers on the road utilizing the Smith System principles. When the training concludes, drivers evaluated are provided with a written assessment identifying problem areas and providing positive, tangible measures to help them overcome weaknesses that might otherwise lead to costly mistakes. This program sets the stage to turn each ride-along session into a powerful platform for driver education and improvement.

## INDEPENDENT LEARNING

### Video Based Self-Study Program

*A cost efficient way to deliver consistent training in the field*

The Smith System Self-Study Program is a go-at-your-own-pace course, designed for the experienced driver. Simple and complete instructions lead drivers through the use of videos and printed materials. In just two hours, drivers are exposed to advanced driving techniques specifically designed to teach avoidance of forward motion and backing collisions. Drivers also receive useful and timely information regarding driving-related substance abuse, driver attitude and seat belt usage. Students take an end-of-course exam to help evaluate material comprehension.

Each student receives two videos, four publications and a written exam.

#### Videos

- **“Critical Point” Part 1 (Truck or Small Vehicle Version)** – This fast-paced presentation explains in detail the techniques behind Smith System’s road-proven “5 Keys to Space Cushion Driving.” Loaded with practical tips and examples, drivers will be educated in advanced driving methods shown to drastically reduce traffic collision potential.
- **Reversing The Trend (Truck or Small Vehicle Version)** – An interesting and fact-filled education in the avoidance of drivers’ most common type of collision, backing a vehicle. Utilizing our “5 Keys,” students learn to master the skills necessary to eliminate backing collisions.

#### Pamphlets

- **Seat Belts Are Cheap Insurance** – The seven most common excuses for not wearing seat belts are stated along with persuasive arguments disproving them are identified in this thought-provoking pamphlet.
- **Smith System Is No Accident Driver Guide** – This 24-page publication contains a fully illustrated summary of Smith System’s forward motion and backing collision prevention techniques.
- **Shortcut To Experience** – This pamphlet is an up-close look at the seldom-recognized connection between drivers who operate vehicles while under the influence of alcohol and those demonstrating attitude, behavioral or emotional problems. These classes of drivers can exhibit similar symptoms and collision potential.
- **Substance Abuse and Driving...The Fatal Combination** – A complete 20-page booklet containing an outline of drug classifications, what constitutes substance abuse and penalties associated with violating related laws. Also included are tips on responsible, legal substance use and ways to identify on-road abusers while there is still time to avoid a collision.
- **Course Comprehension Exam** – This 35-question open-book test evaluates a student’s understanding of the most important elements of the program.

**SSK-025T (Truck Version)**

**SSK-025SV (Small Vehicle Version)**

QTY.	PRICE

### E-Learning

*Driver safety training with worldwide access  
Available in forward and backing modules*

Is it difficult to gather your employees for essential driver safety training? Do employee workloads make it unlikely to schedule training time when everyone can attend? Our e-learning courses could be the best solution for needed training, available in forward and backing modules.

#### ON-LINE TRAINING

This is a highly interactive, multi-media rich, online training course that teaches your employees our time-tested safe driving techniques. To ensure involvement, students are required to respond to questions throughout the learning experience. Upon course completion, each learner takes a test to measure their understanding and retention. The results are stored in a database online available to management 24 hours a day, seven days a week. Including the testing, this course takes most students about 90 minutes to complete.

#### Why Web Based Training?

- Convenient – accessible anytime, anywhere
- Cost effective – eliminates meeting and travel expenses
- Consistent – everyone receives the same course
- Self-paced – efficient use of employee time
- Involvement – interactivity keeps each learner involved
- Easy to implement – no need for an instructor or class materials
- Reports – management can view student course and testing data 24/7
- No software hassles –100% web based
- Please Call For Pricing

#### Computer-Based • Self Study (CBT)

*Study collision avoidance at your own pace on your personal computer*

(Available in Truck and Small Vehicle versions)

Fifty years of proven driver safety training has gone into the development of the Smith System Interactive CD-Rom. This powerful multi-media product enables individuals with minimal computer experience to easily operate the interactive program. With a run time of approximately 2 hours, drivers are exposed to the concepts that have helped thousands of organizations worldwide reduce traffic collisions and other fleet-related costs.

## SEMINAR TRAINING MATERIALS

### Smith System Traffic Safety Seminar Kit

Available in Truck and Small Vehicle versions.

It's all here... discussion material, important safety information, video reinforcement, visual aids (PowerPoint™ and transparencies) and our time-tested, easy to follow instructor guide manual. With just a little preparation on the part of your instructor, your organization will have an effective and interesting driver training seminar. The entire course takes approximately four hours to present, but it can be taught one module at a time in much shorter sessions.

The Modules:

**Part 1: Avoiding The Forward Motion Collision**

**Part 2: Avoiding The Backing - Parking Collision**

**Part 3: Driver Attitude Education**

**Part 4: Substance Abuse Awareness**

**Part 5: Seat Belt Education**

Each Seminar Kit Includes:  
**Instructor Guidebook**

At the heart of our seminar package is the easy-to-follow Instructor Guide. It contains all the guidance your trainer will need to conduct an informative, interesting and thought-provoking presentation.

### Video Package

*(Video descriptions Pages 8 and 9)*

Four videos to reinforce the instructors training:

1. **The Critical Point**
2. **Reversing the Trend**
3. **The Driver's E.D.G.E.**
4. **It's Your Choice**

### Visual Aids

Both transparencies and PowerPoint™ are supplied to provide greater flexibility in presentation format.

### Student Materials

Student handouts are an essential tool to reinforce training. The kit includes twenty five sets of the Student Materials. Additional sets of these materials can be ordered separately.

**Smith System Seminar Kit: SSK-020T, SSK-020SV**

QTY.	PRICE
1-3	\$800.00 ea.
4-10	\$730.00 ea.
11-25	\$640.00 ea.
26-99	\$545.00 ea.
100+	\$470.00 ea.

### Student Seminar Materials

*Comprehensive materials to foster training retention*

Providing well over 100 useful facts and safe driving tips, the Student Seminar Materials are a must have for students receiving instruction based on our seminar kit. These materials supplement and reinforce the Smith System concepts taught in our Traffic Safety Seminar. Providing each one of your drivers with the Student Seminar Materials ensures a more comprehensive understanding of the fundamentals and techniques offered in the program. An open-book examination at the end of the seminar really drives home the education.

Each Student Receives:

- Smith System Is No Accident Driver Guide Book (24 pages) – A time-tested and completely illustrated manual that delivers road-proven methods for avoiding both forward motion and backing collisions.
- Substance Abuse and Driving Booklet – Alcohol and other drugs are major contributors to motor vehicle collisions. This pamphlet focuses on the essential substance abuse related details provided in the seminar.
- Seat Belts are Cheap Insurance Pamphlet – This eight-panel pamphlet takes a common sense approach to the seven most common arguments people make for not using seat belts and delivers compelling factual information that discredits all of them.
- A Course Comprehension Exam – The student's comprehension of the most important elements of the course is challenged in this 40-question, open-book exam. Successful completion of this exam assures that they understand and have mastered the fundamentals of this seminar. Written documentation of student's participation will be provided.
- Certificate of Completion – This two-color, 8 1/2" x 11" certificate recognizes successful completion of the course.

**Student Seminar Materials: SSK-021T, SSK-021SV**

## AIRSIDE TRAINING AND FLEET MONITORING

### 5 Keys to Airside Safety Course

Navigating and driving in the complexities of the aviation setting is no simple task. Drivers in the industry must exercise the same amount of care and concern in the performance of their jobs as pilots do in delivering their passengers and cargo safely to the gate. Our *5 Keys to Airside Safety* course is a specialized curriculum. It is designed to encourage drivers who operate equipment on the airside of airport aprons and roads to develop the critical driving habits required to negotiate ramp environments safely.

Based on our proven techniques, this “train the trainer” course is the first of its kind developed for the many facets of the aviation industry. Designed to be used in conjunction with our standard *Instructor Training Course*, this class expands on your instructor’s knowledge of how to teach the 5 Keys of the Smith System in the demanding and ever changing aviation environment.

Utilizing specialized materials customized to your operating procedures and policies, our instructors teach your driver trainers proven techniques to dramatically reduce costly aircraft strikes, vehicle rollovers and collisions with other equipment or fixed objects.

### Airside Video “Shortcut to Experience” SAV-101

### Compliance Training

Get up-to-date and develop your compliance knowledge

- Motor Carrier Safety Seminar**  
– Get up-to-date on the latest regulations (.6 CEU Credits)
- Hazardous Materials Certification Seminar**  
– Hazmat Certification and compliance review (.6 CEU Credits)
- Accident Investigation for Motor Carriers**  
– This seminar covers proper scene management (.6 CEU Credits)
- Compliance Survey**  
– Let a Smith System professional review your safety program

For Seminar information, dates and locations call or visit our website [www.smith-system.com](http://www.smith-system.com)

### SmithSAFE® Fleet Monitoring Service

*A reporting service with real training solutions*

An unbeatable value, SmithSAFE is the driver monitoring service that gets results. SmithSAFE not only identifies at risk driving behavior but also provides the educational tools to correct it. This cost-effective program goes further than most by integrating monitoring, reporting, training, intervention and analysis. Our optional SmithSAFE Video Package is also available to help strengthen your counseling and corrective efforts.

#### How does the program work?

Highly visible, durable decals with our exclusive 1-888-AM-I-SAFE number are applied to all company vehicles. Then motorists can call our staffed call center 24 hours a day, 365 days a year.

Motorists’ calls are screened for you. The calls are reviewed and verified by a specialist to eliminate false reports. Once the report is verified, notification is then e-mailed to the client to access our Web site for the complete information. The report can be faxed to clients who lack Internet access. Along with the report, supervisors receive “collision countermeasures” to more effectively counsel drivers, reinforce previous training and suggest specific actions to improve driving habits in the future. Clients who have the SmithSAFE Video Package have a series of videos at their fingertips to better address the most common motorist reports.

#### Implementing SmithSAFE will:

- Identify unsafe drivers before they cost your company money
- Have the tools to correct unsafe driving behavior
- Improve profits by reducing collisions
- Reduce insurance claims
- Send a positive image to the public
- Have real time access to driver data live on the web

Why trust your fleet to anyone else? Choose the experts in driver safety for your fleet monitoring service.

## VIDEO PRODUCTS

### Audio-visuals make an indelible impression

#### Outside the Box

*Truck, Step-van and Small Box Vehicle versions available (27-Minutes, 2005)*

NEW  
RELEASE

Drivers who know how to place their vehicles in traffic to maximize their space, their visibility and the time they have to make critical driving decisions have a tremendous safety advantage. In our latest "5 Key" video, we show drivers how to develop these essential driving skills.

In this presentation, viewers learn to see and organize the traffic environment in simple zones. Our Pre-Action and Reaction Zones help drivers recognize and cope with the kinds of hazards that can cause average drivers to have collisions. From the driver's point of view, from the air and from a variety of other camera angles, viewers watch an experienced Smith System instructor use our principles to make the driving task easier, less stressful and safer.

#### The Keys To Foul Weather Driving

*Prepare for changing road conditions (17-Minutes, 2003)*

Safe foul weather driving is a challenge that can be met with experience and driver education. This video demonstrates the many dangerous situations that arise when confronted with driving in foul weather. The video succeeds in teaching the proven methods from the Smith System that provide the skills necessary to drive as safely as possible during inclement weather.

8-12	\$110.00 ea.

#### Following Distance-Resolving The Debate

*A convincing presentation on the benefits of a safe following distance (14-Minute Video or DVD, 2000)*

Following distance plays a major role in most multi-vehicle traffic collisions. Despite the evidence, huge numbers of drivers, either through lack of training or personal choice, continue to maintain inadequate spacing. The main reason for this behavior is drivers thinking that leaving too much space invites other drivers to cut in, resulting in added risk and lost time. **SSV-154T** (Truck Version), **SSV-154SV** (Small Vehicle Version)

#### SSV-154T SSV-154SV

QTY.	PRICE
1-3	\$140.00 ea.
4-7	\$125.00 ea.
8-12	\$110.00 ea.

#### The Most Common Collision

*Viewers analyze three typical backing collisions (20-Minute Video, 1994)*

"The Most Common Collision" showcases three distinct backing collisions as described by the drivers involved in each. The ability to hear and see the drivers' perspectives helps viewers dig into the root causes of each incident. Animated recreations of each collision help to further illustrate and identify both cause and prevention respectively. Mastering the principles covered in this video provides viewers with the skills to significantly reduce their potential for backing and parking mistakes. **SSV-109**

#### SSV-109

QTY.	PRICE
1-3	\$150.00 ea.
4-7	\$135.00 ea.

#### Street Smart

*A birds-eye view of traffic problems and solutions (20-Minute Video, 1993)*

The "Street Smart" video provides an aerial viewpoint of broad error patterns that exist in traffic that are difficult to detect from the ground. This bird's eye view highlights problem areas and identifies potential solutions. Utilizing the "5 Keys" techniques and freeze frame aerial imagery, Smith System instructors isolate individuals and groups of drivers making common and dangerous mistakes. The fast-moving video draws in the drivers of all types of vehicles to the lessons in this dramatic presentation.

#### Intersections - Among The Most Dangerous Places On Earth

*Techniques to reduce intersection related collisions (22-Minutes, 2003)*

Over half of our clients' collisions occur in or around intersections. Turning, braking, limited visibility, pedestrian activity, bad judgment and a tremendous number of visual distractions combine to make intersections among the most hazardous places on earth. This presentation explores the many threats in and around intersections and uses Smith System's "5 Keys" to provide drivers with simple-to-learn and easy to use techniques to dramatically reduce these threats. The show concludes with an engaging animated reenactment of an intersection collision which the audience is asked to analyze based on the knowledge learned earlier. "Intersections-Among the Most Dangerous Places on Earth" is a must-see for any fleet concerned about intersection related collisions.

8-12	\$155.00 ea.

## VIDEO & AUDIO PRODUCTS

### The Driver's E.D.G.E.

*Understand how emotions affect safe driving (17-Minutes, 1999)*

As traffic congestion continues to increase, so too has the anger, aggravation and frustration experienced by motorists. The "Driver's E.D.G.E." uses four driver interviews to outline and identify the most frequent sources of these potentially dangerous behind-the-wheel emotions. Then, with the help of Smith System's "5 Keys," we explore how these feelings can lead to conflict or tragedy. In conclusion, we provide practical, real world solutions that drivers can put into action each time they take the wheel. This presentation will minimize the viewer's collision potential, while providing a foundation for a more relaxed driving experience. Driving behavior and attitude can be positively influenced when an understanding of the Big Picture is realized.

### SSV-155

QTY.	PRICE
1-3	\$195.00 ea.
4-7	\$175.00 ea.
8-12	\$155.00 ea.

### Reversing The Trend

*Discover how to prevent backing collisions (21-Minutes, 1999)*

Our "5 Keys" provide the critical learning necessary to turn backing collisions into rare events. This high-quality video provides dozens of eye-opening tips that make an instantaneous difference in students' approach to backing a vehicle. This presentation can be utilized as an interactive training device (at the option of the group facilitator), where viewers are called upon to quickly use what they have learned in a discussion format. Quality information, student participation and listener acceptance are the benchmarks of this highly successful driver education program. This video will be a frequently used component in your fleet safety library.

### SSV-153T SSV-153SV

QTY.	PRICE
1-3	\$195.00 ea.

### The Critical Point

*Strategic techniques designed to dramatically reduce risk (30-Minutes, 1998)*

This is a two-part presentation that can be viewed in one or two sessions. Part One introduces our time-tested "5 Keys" and explores ways drivers unknowingly relinquish control over their own safety. This powerful knowledge provides the critical thinking needed in Part Two for viewers to participate in analyzing, from an aerial view, common driving patterns that expose motorists to unnecessary risks. "The Critical Point" video offers those new to the "Smith System" an unparalleled insight into their daily traffic surroundings, while refreshing and enhancing the safety knowledge of the veteran user.

### Out Of Harms Way

*Advanced 3-D technology recreates the collisions for class analysis (24-Minute Video, 1996)*

Years of experience have taught us that student participation and driver "buy in" are vital to any successful driver safety training program. Our "Out of Harm's Way" video has been designed specifically to achieve both. After a brief outline of Smith System's "5 Keys," three drivers are interviewed with regard to typical traffic collisions. As the drivers describe their circumstances, each collision is recreated using advanced 3-D animation. This engaging technology allows each incident to be observed as if the viewer was actually present at the original collision.

### The Keys To Safe Lane Changing And Merging

*Important tips for drivers of any vehicle type (15-Minutes, 2002)*

Collisions caused by improper lane changing and merging are frequent, costly and often deadly. These risky actions are also the most common complaint from aggravated motorists calling in to our SmithSAFE Fleet Monitoring Service. "The Keys to Safe Lane Changing and Merging" offers dozens of real-world tips and techniques that will have an instant and lasting impact on drivers of any type of vehicle. A small investment in this production can help you keep your costs and your headaches under control.

## BOOKS • BOOKLETS • SAFETY MEETINGS

**Smith System Is No Accident Driver Guide**

This 24-page, 8.5" x 11," fully illustrated book summarizes Smith System collision prevention techniques based on our "5 Keys" approach to safe driving. Available in Truck and Small Vehicle versions.

Each book contains two sections:

- (1) Avoiding Forward Motion Collisions
- (2) Avoiding Backing Collisions

**SSB-322T  
SSB-322SV**

1,000-4999	\$.60 ea.
5,000+	\$.45 ea.

**Substance Abuse And Driving,  
The Fatal Combination – Booklet**

Substance abuse both at the workplace and on the road is something we all face daily. How well we are able to recognize and adjust to the hazards substance-abusing drivers create is critical in avoiding potential disaster. The "Substance Abuse and Driving" booklet discusses the magnitude of the problem, drug classifications, the definition of substance abuse and the facts that refute common misconceptions. The booklet also provides crucial on-road tips for recognizing and avoiding substance-abusing drivers while there is still time to prevent trouble.

**Driver Fatigue Safety Meeting**

*Interactive seminar materials on the dangers of drowsy driving*

Let's face it, drowsy driving is something we've all experienced at one time or another. This ever-present risk contributes to countless driving-related injuries and fatalities each year. The Driver Fatigue Safety Meeting is a fast-paced, interactive seminar identifying the causes of fatigue along with creative ways to overcome them. The instructor package for this meeting comes complete with Instructor Guidebook and either transparencies or PowerPoint™ slides on a CD-Rom. We recommend our "Dangers of Drowsy Driving" pamphlet as an audience handout in conjunction with this meeting.

## ARRIVE ALIVE SAFETY MEETING SERIES

Effective driver education requires ongoing and constant exposure to safe driving techniques. The Let's Arrive Alive Series reinforces safety information taught from a "5 Keys" perspective. It is ideal for informal safety meetings or as a "paycheck stuffer" for your employees. Each title includes an Instructor Meeting Guide making it easy for anyone to lead a short safety meeting.

### Safety: It's More Than A Word SSB-317A

This handout cleverly uses each letter of the word "SAFETY" to emphasize key techniques necessary to successfully apply our traffic safety system. This system gives your drivers more space, visibility and awareness than they ever thought possible.

### Avoiding The Rear End Collision SSB-317B

Rear-end collisions can be avoidable. Interesting ideas and useful tactics to avoid being struck from behind are outlined in this must-read pamphlet.

### Proper Positioning In Traffic SSB-317C

Avoiding collisions is more than just a matter of luck. Intelligent vehicle positioning can reduce risk tremendously. This informative handout explains ways to insulate your vehicle in traffic.

### Following Distance: Resolving The Debate SSB-317D

Sufficient following distance is crucial to safe driving and yet few drivers maintain the proper spacing. This handout explores the reasons behind driving too close and explains our suggested following distance.

### Safe And Skillful Braking SSB-317E

Seldom thought of suggestions for proper braking are covered in this pamphlet. These braking techniques can reduce risk of rear-enders, minimize brake wear and improve fuel economy.

### Shortcut To Experience SSB-317F

Most drivers acknowledge that anger behind the wheel is a dangerous emotion, however few make a concerted effort to make positive changes as they do not recognize themselves at risk. This lesson takes the audience through a startling parallel between being under the influence of alcohol and being under the influence of a variety of emotions.

### Building Effective Seeing Habits SSB-317G

Many traffic collisions are a result of critical information going unnoticed by drivers until it is too late to analyze the situation and effectively act upon it. This handout summarizes how to develop and utilize the "5 Keys" of visual habits.

### Foul Weather Driving SSB-317H

This handout teaches the skills necessary to understand and safely adjust for poor weather conditions which can arise quickly.

### Avoiding Intersection Accidents SSB-317I

Intersection collisions are one of the most common and serious driving mishaps. Simple, common sense strategies are explained to help drivers dramatically reduce risks in and around intersections.

### Avoiding A Backing Accident SSB-317J

The average fleet experiences more backing collisions than any other single type of motor vehicle conflict. The easily learned methods explained in this pamphlet can bring about substantial reduction in these frustrating and potentially dangerous incidents.

### Seat Belts Are Cheap Insurance SSB-317K

There are still a surprising number of motorists who do not wear their seat belts. The goal of this pamphlet is to discredit the seven most common arguments for not wearing a seat belt.

### Margin For Error SSB-317L

Each day, drivers are confronted with thousands of opportunities to make mistakes behind the wheel. Learn how the "margin for error" is greatly increased if logical, proactive measures are applied in advance of these potential errors in this lesson.

### Dangers of Drowsy Driving SSB-317M

Fatigue has a hand in thousands of traffic incidents. Causes of fatigue, misconceptions about remedies and important driving strategies for coping with drowsiness are explored in this handout.

### Juggling Behind The Wheel SSB-317N

Drivers using mobile phones are four times more likely to be involved in a traffic collision than when they are not in use. This pamphlet first addresses the dangers of phone use while driving and then unveils a series of logical tips to reduce these risks.

## INTERNATIONAL TRAINING SERVICES

### Apply proven practices worldwide

#### International Training Services

*Adaptable principles and techniques applicable any place in the world*

Successful multinational companies take their proven business models and time-tested best practices and apply them to their organizations worldwide. It is no different for their international driver training needs as well. They count on Smith System to deliver consistent driver safety training all over the world.

The Smith System works anywhere, in any environment – and we prove it by teaching on the roads and highways your drivers face every day. From the jungles of Guyana to the deserts of Egypt or the frantic traffic of Tokyo, Smith System trained drivers successfully apply our techniques everyday to minimize the risks they face while behind the wheel.

If you have needs in Europe, we have instructors based there to deliver cost-effective, on-road training directly to your fleet drivers. These trainers speak the native languages, understand local rules and customs and are supported by our wide array of translated materials.

Use our U.S. based instructors to fulfill your training needs in other parts of the world. We have years of experience presenting our on-road training internationally. Last year, we trained in North America, Central America, South America, Europe, Asia, Africa and Australia.

No matter where your drivers are located, we can deliver high-quality driver safety training that brings immediate results. If you are concerned about the safety of your employees behind the wheel, give us a call.
